

AminoMax

What is AminoMax?

AminoMax is a water soluble biostimulant based on amino acids and peptides.

AminoMax has been specially formulated to enhance crop growth, improve root development and nutrient assimilation.

How AminoMax works:

- Provides plants with readily available amino acids and peptide which helps to improve the plants development
- Stronger plants are productive plants
- AminoMax can be applied as a spray, seed treatment and through hydroponics systems

Benefits:

- Enhanced plant growth
- Increased yield
- Improved quality
- Stress tolerance
- Enhanced nutrient availability
- Healthier plants
- Improved root formation
- Better fruit set
- Improved stress tolerance

Application Info:

- Foliar: 2.5kg/1,000 litres of water every two weeks during vegetation period
- Hydroponics: 0.5kg/1,000 litres of water per week

Crops:

- For use in all soft fruit, vegetable production and other edible and non-edible crops.
